URANUS HARMONIC 2-A

A STUDY OF THE FOLLOWING PAGES, DEVOTED TO AN ANALYSIS OF THE SPECIFIC AND PERSONAL influences of the Uranian vibrations, will reveal the unique and highly unusual nature of the Consciousness we must attain to if we are to properly evaluate the New Age of Aquarius, governed by Uranus, The Breaker of Patterns.

Unless you, the student of the New Age Principles, begin to realize in a most literal and actual degree that most of your old world must be dumped overboard, into the Sea of Forgetfulness, Uranus will give you a painful time as you endeavor to follow his path over truly uncharted seas.

So many people, calling themselves Students of the New Age, dabble with these dynamic potencies of Uranus in theory; and with actually no intention of trying to make the changes in their personal thoughts and habits which are imperative. Consequently there always comes a time when they are brought up against the brutal reality of Uranian forces (forces which produced the Russian Revolution) and compelled either to promptly destroy their outmoded concepts---or to imagine themselves an exception to the rule. Occultism overflows with people who are exceptions to the rule; those, for example, who insist that they have outgrown their horoscope, or worse, that the Stars do not affect them. The asylums are full of wretched souls of this character.

There are a good many students of the New Age who insist that, with God, they are equal if not superior to all material problems and limitations. These blessed people go about chanting affirmations, divine statements, mantra and "scientific-prayers" which, they have been assured by this or that teacher, will enable them to demonstrate their every need and requirement, wish and desire. These people, so they believe, are above The Law; or at least they are in possession of a "Higher Law" which enables them to avoid and evade the principle of Mass Evolution. This is because their "Masters" or "The Great White Brotherhood" of which they are a paid-up member have released them from the tawdry burdens of the old Law of Cause and Effect. "God will take care of us," is their invincible slogan, their eternal response to all suggestions that they, personally, should take a more intelligent interest in their own destiny.

"Be still, and know I am God!" How often one hears this amazing statement in our metaphysical groups. "God's in His heaven; all's right with me!" Another magical statement, guaranteed to produce mighty miracles of personal protection and preservation, not to mention prosperity and perfection! But why not look at the record, and be miserably realistic with ourselves---just for once??

How many times, actually, has God failed to answer (or hear) your prayers? And how many times has the Law of Cause and Effect caught up with you---and knocked you flat? Even though you WERE affirming with all your might that "I am Mind and have everything The Father hath"? Or any of the other thousand and one tricky statements of empty words that sound wonderfully impressive? Why, and if you are reading these pages it must be so, why have YOU failed to inherit The Kingdom of God, that state of Cosmic Consciousness toward which all religions, faiths, systems, isms and ologies are trying to take mankind, and you??

URANUS HARMONIC: OF THE FIVE COSMIC CENTERS ACTING WITHIN OR AROUND OUR human heads Uranus is the most difficult to open up and properly control. This is because Uranus is concerned with absolute Reality, or Truth. And so few of us are ever concerned with Basic Realities, Absolute Truths, bitter facts! Now for this very reason, the fact that most of us are day-dreamers, illusionists fearful of touching stark truth, the exercise to follow will be of tremendous value to the sincere and sensible student. It is an exercise that will not be new to all of you, and at first glance it may seem like old stuff; but none of you have ever before received the reason and essential purpose of this exercise to nourish and strengthen the Uranian Center.

THE URANIAN EXERCISE: This is the Exercise sometimes called the Retrogressive Meditation, for you will learn to think backwards, in reverse. And just what is the purpose of this Exercise? It is something you would never imagine. Therefore we must learn all of its features carefully and fully.

Most students prefer to take this exercise just before they go to sleep, and to use it as a quieting process to still their nerves and induce sleep. But, at first, it may have just the opposite effect: it may prevent sleep---for a truly remarkable reason. It will reveal to you the full truth of your own nature---something that may well make sleep impossible!

As you rest in bed turn your mind back upon the day you have just lived thru. But start with the things you have just done. Review the evening, then the afternoon, then morning, going back to the very moment you first awakened once more to the material plane and all its troubles. This should be a gentle and easy review, taking things as they come back to your memory, without struggle to go into detail. You will have to go over the daily schedule several times in order to recall the events and put them in their proper time-place---and this is important, for you are actually building a bridge of consciousness. However, this consciousness is not to stop at the point where you first awakened in the morning. There is a greater end than that for this exercise. But first let us get the hang of it so we can review our days with skill and deep penetration. In order to really summarize your day it is necessary to evaluate it. That is, look over the events carefully and decide which one was of greatest importance to you. What was the high point of the day? What one thing will you want most to remember? Will you want to re-experience any of the events? If you could live the day over, which things would you NOT do?

You are to treat your day as the man in business notes his sales and all the many activities connected with such a profession. And be utterly, brutally, honest in your summary. Remember, you are alone in your Inner Sanctum. No one but you knows what you are thinking---and admitting to yourself. So be as completely realistic as you know how. Remember, the Great Ones advise us: Never deceive yourself. Confuse, deceive, kid everybody else, if you must; but NEVER, NEVER kid yourself. If you are absolutely honest WITH YOURSELF, FIRST, you will rarely find it necessary, or profitable, to deceive anyone else!

This feature of absolute honesty, infallible accuracy, stark reality, is the mission and purpose of Uranus. And it begins, like charity, at home, right in your own private world. Unless and until you have developed this principle of personal integrity, and hold fast to it though the heavens fall, you can never inherit your lawful authority, as an Individual, in the Uranian-Aquarian Age of the Masses. You must never invalidate your own essential divinity!

URANUS HARMONIC: EACH TIME YOU CARRY YOUR CONSCIOUSNESS, IN MEMORY, BACK TO the moment when you awakened in the morning, pause for a few seconds, and just wait; watch and see what you recall at this delicate instant. For this is the heart of the Exercise. You are to endeavor to regain, in consciousness, the state of mind you were experiencing just BEFORE YOU AWAKENED.

Why is this period so important? Because The Uranian-Patterns were being revealed to you, and impressed upon your Astral Consciousness.

And now you can see why I stated that never before have we had the proper explanation behind this Exercise.

There is a period, sometimes short, sometimes long, between our consciousness in the Astral Planes and our awakened state in the material world. This is the most valuable time in the entire twenty-four hours of our daily living. For The Great Guardians are endeavoring to implant in our minds those aspects of The New Age which we **MUST** understand if we are to become as They.

It has been stated that The Uranian Lords of Outer-Space are speaking to us, to many of our earth people, during our sleep. This is true. And the hour of these communications is always in those few minutes just before we step back into our flesh bodies after our night in the astral planes.

There is also another period of great importance to the Soul as it seeks to make its way up the evolutionary arc to divine consciousness. This is the period between embodiments,, between rebirths. This period will someday be as real to you as the period between sleep and waking each partly day. And this present Exercise will eventually teach you how to touch this magic hour that you had between your rebirths---and reveal incredible things to you.

There are several features of this Uranian Exercise which are important and practical, apart from the spiritual aspect we are now considering. You will discover that many nervous ailments will be greatly relieved, if not entirely removed, as you learn how to weave each event of your day into a unified and positive membrane of consciousness. You will observe a growing degree of self-confidence as you carefully itemize and note the different things which make up your daily life. You will see a fascination in many of the things you have to do that you could never imagined they contained before.

The secret of the power which radio, television and the movies have for most of us lies in the fact that we are silent observers of the Laws of Life as they move through other peoples affairs. And you will discover in your own personal activities as much interest, or more, that you now find in these many performances---designed to take your mind off of your own world and affairs. Most of our lives are so uneventful, we think, that we turn eagerly to watch what happens to someone else, even though it is just a movie or television. This Uranian Exercise will return your consciousness where it **BELONGS**, to **YOU**. Habits that are troubling you often disappear when you begin to look closely at them each night as you prepare for sleep. And fears vanish. Doubts flee! Worries lessen for you begin to see them as they really are. All of these however, are but incidental points to the great purpose behind the Exercise. That purpose is to touch, in consciousness, the moment you knew just before sleep vanished and you stepped back into your fleshly body of darkness.

URANUS HARMONIC: THE EXPERIENCES WHICH THE STUDENT WILL HAVE AS HE GOES TO sleep at night are not to be confused with those real and vital manifestations of Cosmic Contact which he will have as he awakens in the morning. The majority of us, as we begin to fall asleep at night, will hear our names called, see incidental visions and have an assortment of emotional reactions. These are rarely of any value, since they are largely reflection of the things, patterns and personalities in our Aura. They are the result of the day's activities. They should be ignored so that we may quickly fall asleep and step out in our Astral Body and begin our positive and regulated activities.

For those who are so fortunate as to be able to "sleep when their head hits the pillow," it will be necessary to take this Uranus Exercise before they get into bed---since it should be done with a certain amount of alertness.

All of us are eager to remember what we are doing in The Astral Worlds while our flesh bodies are asleep. This Uranus Exercise is the first step towards that highly desirable ability. It will depend upon your own personal efforts exactly as every other project in human life depends on the efforts we make. Just take it easy, and do not expect to accomplish everything overnight. It is remarkable how impractical and foolish students of occult law can be in their efforts and attitudes. No one would dream of being able to paint, sing, play music, learn French or any other new talent without spending much time in learning the necessary rudiments. But with spiritual matters it is strangely and absurdly different. Many give up the first week, saying it is too deep for me. The same common-sense one applies in ordinary human activities will work miracles for the Occult Student IF he will but apply it to his spiritual studies.

This Exercise of Uranus is doubly important for this very reason. Uranus will destroy every pattern based on any premise less than absolute truth and reality. Your only salvation is absolute personal integrity. For only this will give you a balanced Aura. Only a balanced force-field will survive the Rays of the most powerful of all the Planetary Rays, Uranus, The Fiery Light of the Atom.

The simple procedure of nightly reviewing your daily life will soon give you a sense of personal stability and individual responsibility which will sustain you in your efforts to recognize reality, truth, and accept it for what it is. And accept yourself for exactly what you are---good, bad, indifferent, or whatnot. But you MUST accept your self for that which you know you are. In this there can be no quarter, no exception, no reservation mentally or emotionally.

The Uranus Exercise may produce strange reactions in your head. A pressure around the eyes is typical. Headaches are very common. Tightness in the throat and nostrils often follows your Retrogressive Meditation. However, it is nothing to worry about. Rather you should be happy that at least something IS happening. Do you worry about new muscles aching after strange exercise or physical efforts? Then don't worry about the symptoms of Uranus as they begin to show up in various parts of your body, especially the head area. Be glad! Give thanks that you ARE making progress. Then go on, faithfully go on and on.

Page Four.

Faithfully and Friendly,

GERALD-LIGHT.

★ URANUS IS THE PLANET OF ALTRUISM AND PHILANTHROPY, OF UNIVERSAL Brotherhood. It projects these qualities most strongly through its own sign of Aquarius. Like Neptune, it is a highly Mystical and Spiritual Planet, and moving through each Sign for seven years, its Influence is difficult to check and determine except over long periods of time.

It is also called the Planet of the Unexpected, the Unusual, and the Original, for it brings things both good and bad, which we can give no logical reason for. Its action is sudden and explosive, always unexpected and unprepared for. Uranus is the Rebel, the Revolutionary Spirit of the System. The sources of its Inspiration lie hidden so deeply below the surface, that it is very difficult to understand the actions of persons inspired by its quixotic Rays. It brings sudden and extraordinary events and experiences, both good and bad. It elevates an obscure and apparently undeserving person to the heights of fame and wealth overnight, and just as suddenly strikes from such a position an Individual who seems to have earned his reward through a lifetime of effort and labor.

Uranus is Destiny; for this reason he does not stop to explain why he so suddenly raises one and vanquishes another. Saturn is also Destiny, but he is understandable, foreseeable destiny which comes gradually and gives plenty of warning of its approach. The Destiny which Uranus hurls to the surface of our life is something that we do not know about, something he has seized on far below, within the hidden depths of our Subconscious Beings, and then explodes it upon our amazed minds.

Uranians are people of the future, hence they aim for great and noble things. Their Intuitions are extremely sharp and they usually perceive the course of the events of the ages long ahead of the rest of Humanity. This very faculty of seeing so far in the future makes it difficult for them to live in the slow-moving present; and their annoyance, with outmoded ideas and conditions, often makes them irritable and impatient, bringing them frequently to the point of eccentricity in their ways and actions. They love modern inventions, electrical machines and all the new and modern methods of scientific living.

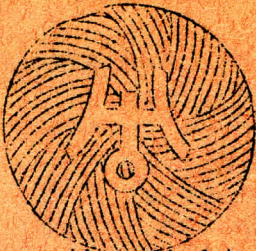

URANUS---THE DIVINE REBEL

* * * * *

URANUS GIVES TO THE SOUL SOME VERY UNUSUAL AND PECULIAR QUALITIES, to say the least! And the person who is born under the strong influence of this unusual Planet, Uranus, will certainly not lead much of an ordinary life, in any sense of the term! At best, he can be a world-famous character who seeks the far horizons beyond the known limits of present knowledge. It can be the knowledge of mental, moral, earth or spirit planes; but it will be something not available to us just for the asking. And it seems the harder something is to attain, the better the true Uranian likes it. He will be the great explorer of the frozen wastes of the icy Poles. The Pioneer in education, or science or adventure or any (or all) of the constructive endeavors of human life. And, if he is well provided against the extreme sensationalism which this extraordinary planet gives, if he is founded on the bed-rock of a sane mental balance---the world will be indebted to him.

On the other hand, Uranus at its worse will produce something that can be completely sad and pitiful in its utter collapse of wisdom and intelligence. It, at its worst, makes one the foolish revolutionary, the rebel, the anarchist who wishes to do nothing but to tear down, to destroy and ruin. It has been poetically said that "Whom the gods wish to destroy they first make mad." And they undoubtedly call upon the furious power of Uranus to lay the foundation for this destruction; for Uranus can be utterly wild and insane in a plan or project---and yet be quite certain it is the best thing that ever happened. Fortunately, such individuals as those who do express the discordant nature of Uranus are rare. And they are rare because it requires a tremendous Soul to be able to receive the Rays of Uranus, direct and in the pure, undiluted state. Every Great Saviour, Messiah and World Teacher has been strongly under the Rays of Uranus. And the terrible dangers of this planet can be clearly seen in the number of would-be saviours that come in Their Name and seek to share Their glory. Most of these misguided and deluded souls have strong Uranian tendencies---but they are unable to endure and sensibly express them. Thus, we have "Cranks" "Prophets" "Redeemers" and the whole collection of strange souls, many of whom are utterly sincere and earnest in their efforts and hopes. Uranus gives great ambitions and desires to express them in great and wonderful ways---but Uranus does not give wisdom, understanding or even common-sense to use the ideas! That comes from other planets.

The soul who is a strongly Uranian type will always have a great deal of trouble and sorrow in his efforts to live his life---for he will never want to live it as do the rest of Mankind (and Mankind demands that we all live exactly alike, or else.) His way is always different and usually much harder---for he will be fighting for a great goal. There are Uranians in every walk of life, most of them truly great and heroic souls---but usually very unhappy, dissatisfied, weary and worn---yet never surrendering to the musty standards of the Masses, no matter what price civilization and its traditional demands may make on him.

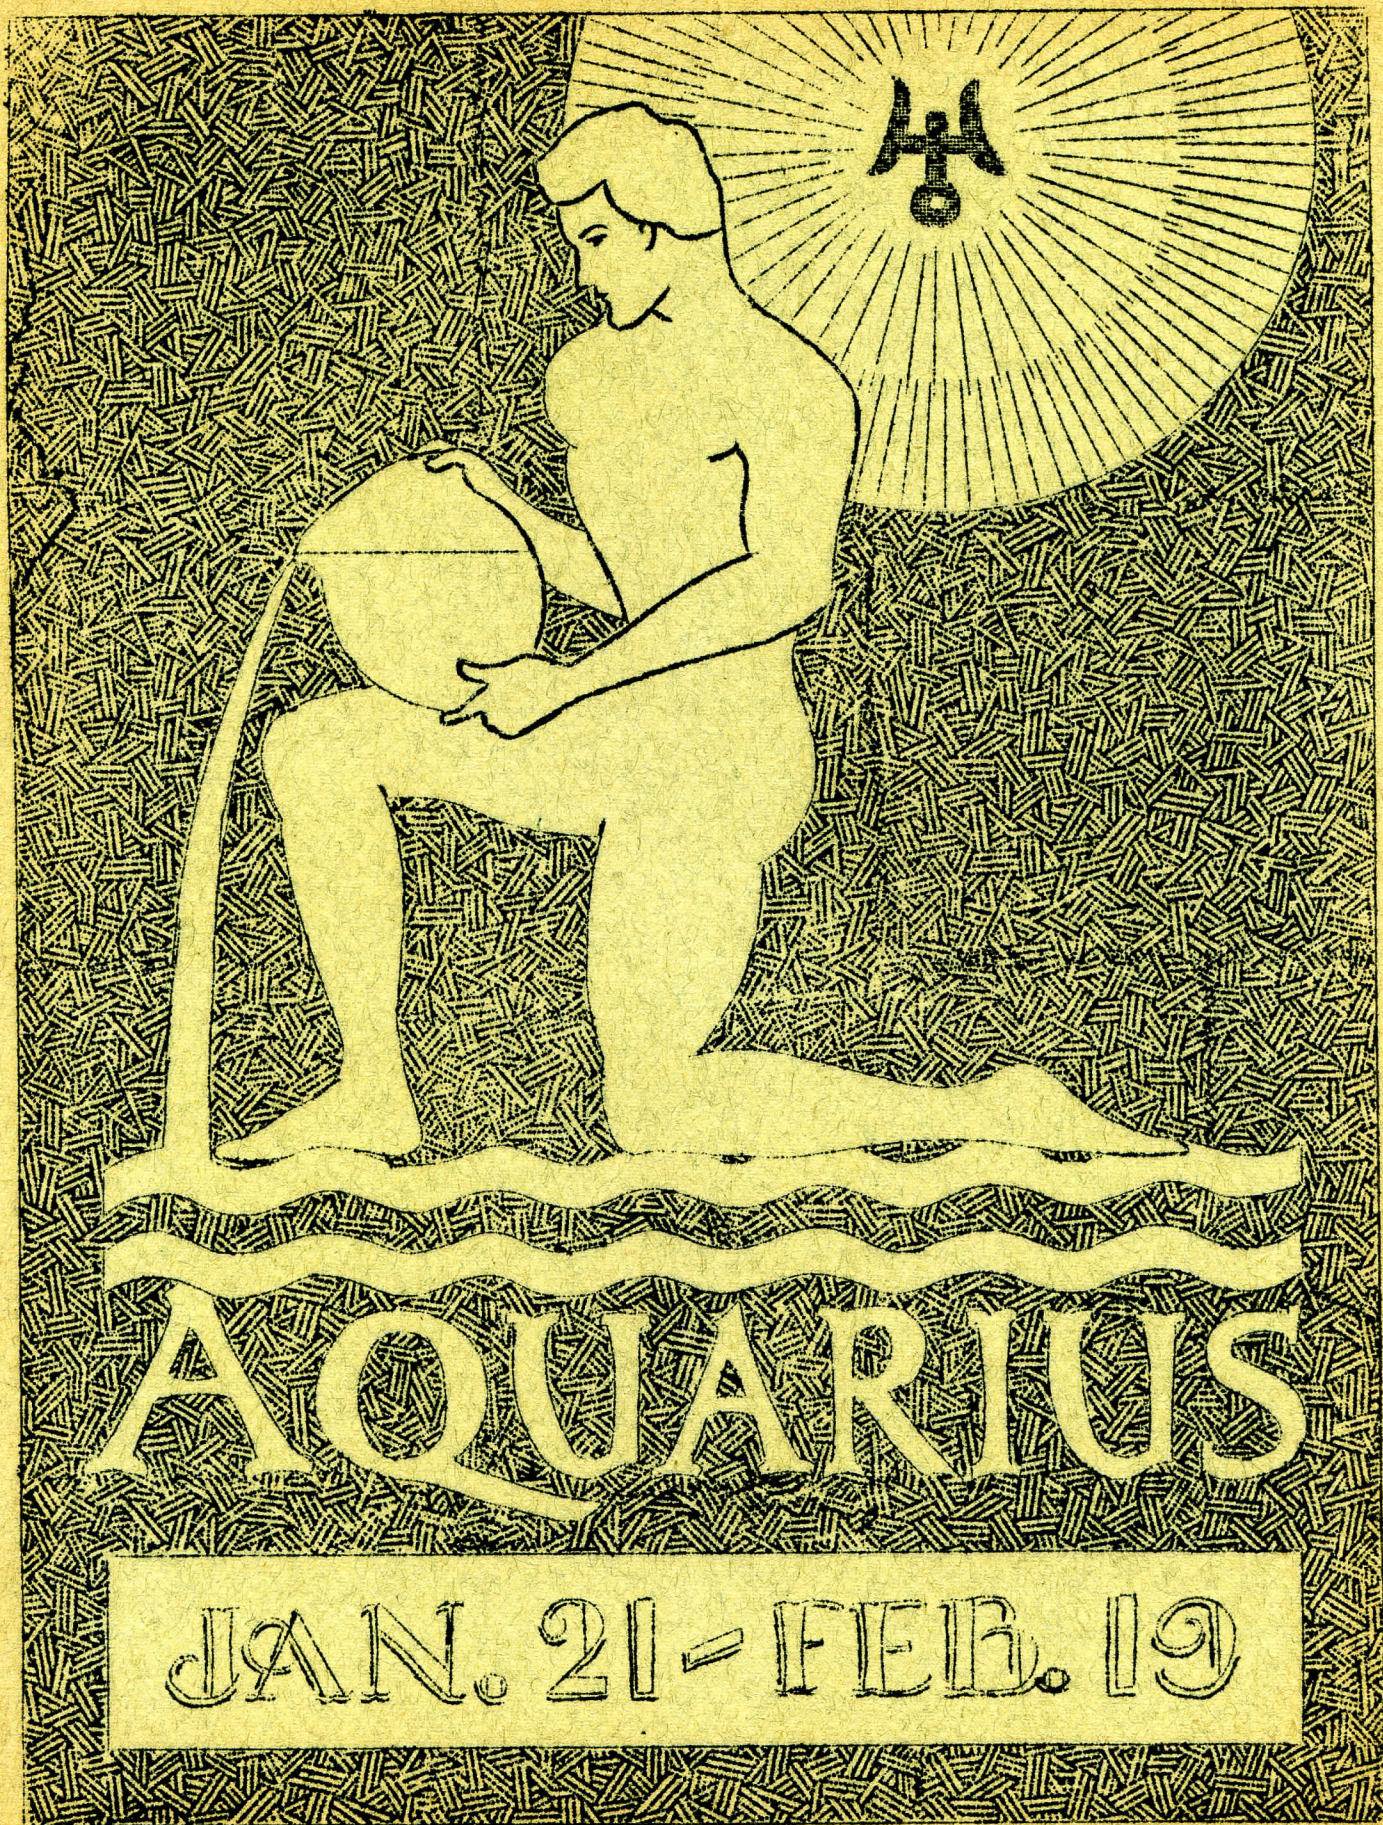

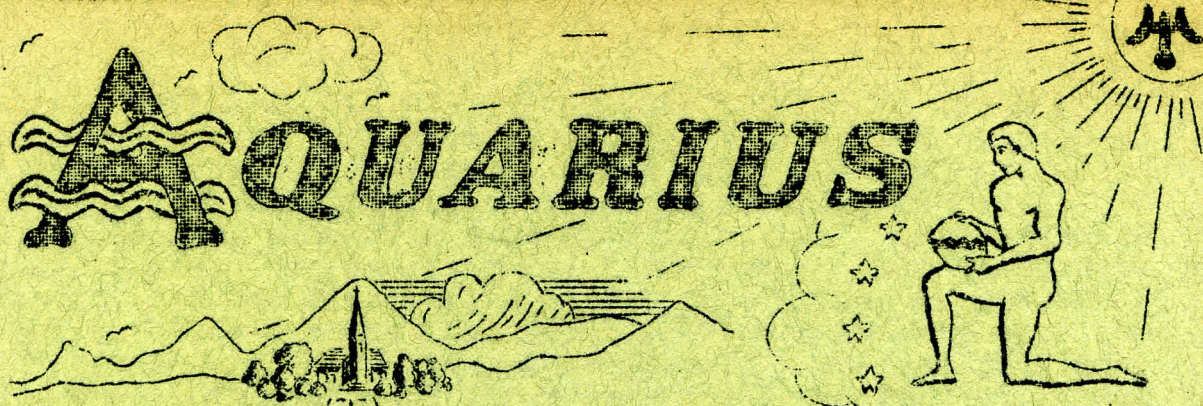

URANUS IS OFTEN CALLED "THE AWAKENER," "REVEALER," and "The Initiator." But it requires one with a deep consciousness of things Spiritual to be able to respond to these "awakening, revealing, and initiating" vibrations; respond sufficiently to secure immediate and physical benefits from the mighty Rays of this Planet. The vast majority of the Race do not feel or respond to the highly refined Currents which emanate from Uranus throughout their lives. Until 1781, when it was rediscovered by Sir William Herschel, only the Initiates and Adepts knew of the existence and Occult Influence of this planet. Today, however, after almost 200 years of study and observation of Uranus, Mankind is quite keenly aware of its effects, if not its importance. For, with the other Planets of Saturn and Mars, the present War and its many related hardships has come about. If you were born when the Sun was in Libra (Sept. 24 to Oct. 24) Uranus has been in beneficent or friendly aspect to your Natal Sun since 1942. This most helpful and Progressive Influence will continue until 1949. Also if you were born when the Sun was in Aquarius (Jan. 21 to Feb. 20), you will enjoy the same benevolent and elevating influences. Should your birth Sign be Gemini (May 22 to June 22) your Natal Sun and Uranus will unite in a conjunction sometime during these seven years '42 to '49, giving you a most interesting time, to say the least! The difficult, rebellious, and unexpected aspects of this mystic Star will be felt by those whose birthday comes in Pisces, (Feb. 20 to March 22), those born during Virgo (Aug. 24 to Sept. 24) and also for Sagittarius, which opposes Gemini (Nov. 23 to Dec. 23). If your birthday falls in any of these three Signs, Virgo, Sagittarius or Pisces, you will probably have already felt the disturbing, unbalanced, chaotic resistance of the Rays of Uranus, the Great Revolutionary. His Influence will, of course, be modified, for good or bad, by the presence and activity of the other planets. In June 1949, Uranus will pass into the Sign Cancer, where it will stay for seven years--and produce a number of things which most people don't like to think about--just as they did not like to think about the War which Astrologers said must come when Uranus entered Gemini. When we learn to accept the Fiat of the Father-in-Heaven, and prepare to abide by His Decrees, as comfortably as possible, then we will have learned the first big lesson in our mortal lives. We can not, and we should never try, to defeat the Message, the Plan, the True Image of Progress, which He ordains for His children. When we know and FOLLOW our Perfect Divine Plan, we will never have to suffer and endure the many trials and hardships that come to us otherwise. Obedience is not only a beautiful homage to our Parent, but the height of good sound common-sense (which is a very rare treasure, indeed!) And Uranus is the Divine Staff with which God pushes us back into line when we get too far out of our Original Plans.

URANUS RULES THE HUMANITARIAN SIGN OF AQUARIUS, THE NEW AGE of 2000 years which is now dawning upon our earth. Few are able to comprehend its vibrations unless their results are observed over long periods of time and in great fields of international activities. Russia is ruled by Aquarius and is therefore strongly under the domination of Uranus. The rebellious, chaotic, unpredictable and anarchistic tendencies of this Planet, when under evil aspects, is dramatically clear when we realize that Uranus in the fateful 22nd Degree of Aquarius produced the terrible Bolsheviki Revolution--with all of its wanton cruelty, terror, and unnecessary death. Uranus produces things, and people, which are different, peculiar and unusual. This is quite apparent from a casual observation of the developments made in Russia since their "experiment in social evolution" was inaugurated in 1917. Uranus in Gemini, the Sign governing communication, transportation--and food, has produced amazing things that were all quite new in our experience. Uranus governs airplanes, explosives, electricity and modern inventions. And the development of the super-dreadnaughts which fly at terrific speeds and at great heights, have been the most important factor in the War. For those who are interested in knowing what Uranus, and the other Planets, will bring in the years immediately following the close of the War, I have prepared a booklet outlining the various things which we must prepare for--and PREPARE FOR NOW. Remember, Uranus gives no indication of what it will do at any time. One can not learn, from the Planet itself, just how it will act once it makes its contact with the other planets and the other Signs. It is necessary to use Clairvoyance and Spiritual Vision to discover what path of action, and what kind of experiences, this dynamic Rebel of the Heavens will follow in Cancer, for the next seven years, after 1949; when it starts its new Cycle.

To know and understand the Influence of Uranus upon your own personal life, it is necessary to erect your Horoscope, and to observe its activity in connection with the Science of the Sacred Numbers or Divine Cosmic Vibrations. We do not understand enough of any one Astral Science to use it alone. All Occult Knowledge must be combined as One Perfect and unified Pattern to discover our Divine Plan of Power.

AQUARIUS IS RULED BY THE GREAT PLANET URANUS. Thus it gives the impression of being related with the future. The Aquarian Age is a cycle of two thousand years into which we are now entering. It is being watched by Students everywhere--for many wonderful and highly constructive aims of "The Great Souls" are expected to take place during it.

THE Astrological Ray of Aquarius is very conspicuous in the physical make-up of a person in that it gives a peculiar penetrating quality to the eyes. The Aquarian eye is said to be hypnotic--but it is more accurately described by the term "magnetic," for the Aquarian never uses his brilliantly vivid eyes in such evil things as hypnotism. This X-Ray quality of his eyes is symbolic of the keen penetration of his mind and the electric power of his insight, rather than of any kind of hypnotic eyesight.

AQUARIUS is an excellent judge of character, following a mental process of analysis and observation rather than that of intuition or emotion. Being able to set aside his feelings and make his decision purely from the level of observed facts, he is a first class psychologist, scientist, executive, inventor. He is by no means lacking in emotion; but understands the wisdom of separating reasons and emotions in order to arrive at sound judgments and conclusions.

Aquarians desire knowledge for its own sake. They often pursue knowledge without ever putting it to use. In those cases where we have Aquarians who made great use of their knowledge, such as Edison, we yet have an intellect that is more interested in the experiment than in its final uses. For this reason, Edison was able to make some forty thousand experiments before he found a way to make the electric light bulb burn properly--being interested in each experiment for itself first and the practical result later. In matters that require a great deal of intelligent experiment such as inventions and scientific research, Aquarius is able to make marvelous use of his keen enjoyment of knowledge for its own sake.

Aquarius is known as the Sign of Humanity. It numbers under its Ray many of the world's great benefactors; for it is a Sign of Democracy, of Liberation and Good-will. The Aquarian dislikes social class and racial distinctions. He is interested in a person as a human being and not in his social or moral background. He is the Knight in shining armor, campaigning for a "Cause" and is the guiding spirit in nearly every great humanitarian movement and plan.

AQUARIUS THE FRIEND OF THE WORLD.

AQUARIUS IS THE OPTOMIST OF THE ZODIAC. NO MATTER HOW BAD things may be, he can always see through and beyond them into better conditions. This gives him a sense of poise and calm and helps him maintain his balance during time of trouble and disturbances. And this calm is a fortunate quality, for he frequently sees so far ahead in his ideas and plans that, to those who undertake a more immediate view of the situation, he may seem nothing more than a foolish dreamer. While he does usually have a good plan or ideas, he needs to be careful to make sure that conditions are ready for the venture when he tries to get it under way--for it is one thing to work out a good plan for the welfare of Humanity or for himself, and it is another thing indeed to choose the proper time in which to inaugurate those far-reaching ideas and plans.

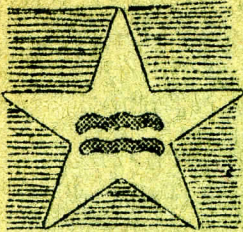

Because of their abiding faith in the future, Aquarians are prone to neglect the demands of the present, and thus they are accused of being impractical visionaries. The tremendous breadth of vision given to persons under this Ray causes them to have a truly universal outlook and an interest in Humanity as a great manifestation of a universal father, rather than as a conglomerate hodge-podge of races, religions and creeds.

THE Aquarian sincerely desires freedom for all races and all peoples, because he himself must have this same freedom. His spirit will be crushed quickly if he is obliged to bend to dogmatic authority and power, whether religious or legal, emotional or mental. Yet, in his stubborn adherence to an ideal, he is quite capable of compelling others to bend to an authority of his which is just as dogmatic and impersonal.

His universal outlook makes of him a cosmopolitan at heart, and not so much a member of any particular race or country. Racial and national barriers mean nothing to him, but so many conventions and traditions to be broken down and dissolved. The Brotherhood of Man finds in him a true disciple and also a faithful and courageous ally.

THIS strong urge to break down all barriers or to destroy limiting traditions and ideas that he, as well as the entirety of men, may have complete freedom, is due to the influence of the great Planet Uranus, the Rebel of the Heavens. This is one of the characteristics of progress that can get out of control, for Uranus is a tremendously powerful and unpredictable Orb. The Aquarian then may become merely an anarchist, a rebel, an eccentric crank, causing trouble and confusion wherever he goes.

The Aquarians genuine interest in people gives him a bright atmosphere of sincerity and personal integrity. It is very possible for the Aquarian to actually be more interested in your happiness than in his own, so completely interested does he become in finding a constructive solution to all sorts of human problems. Nothing is more satisfying to him than to have the opportunity of trying to untangle your life, and to get you off to a new start, strengthened with new courage and inspiration. He will almost always do a good job of it. Having by nature a deep understanding of people as humans, and being entirely sincere and unselfish in his desire to aid his fellows--together with the habit of keeping his emotions out of the question--he makes the perfect advisor, confidant, the Father Confessor of the Zodiac, and in all a valuable Soul.

IN APPEARANCE, AQUARIUS IS ALMOST HANDSOME AND VERY attractive, even though his features may not actually have much beauty. This is because of the atmosphere of beauty, of sincerity and genuine Christ-like qualities which fill the true Aquarian's heart. His face is long and oval, with a high forehead expressing benevolence and much power of profound thought. The nose follows no particular lines in each case, but is always pleasing in structure and size, neither too large nor too small. The mouth is usually small, with thin, rather compressed lips suggesting chastity and forbearance. The most distinguishing feature of Aquarius is his eyes. These are always outstanding. The eye of Aquarius is that which is found on the Great Seal of both the United States and the Pyramid of Egypt. It is brilliant and penetrating and all-observing; but it is not so intense as the Scorpio eye, and the Divine Flame within it seems to be in a state of glowing light rather than the burning, piercing view of some of the other Signs. Aquarians eyes are, much like Libra eyes, and are often mistaken for them. Their color will be brown, or grey with a tendency toward blue. They are large and luminous and full of expression. The body of this Sign follows the lines of moderation which are so characteristic of the Aquarian. It is neither large nor small; neither strong or weak. Everything is well proportioned, and pleasing in line.

Aquarius rules the calves of the legs, the ankles, the teeth and the circulation. Sympathetically, it governs the heart, throat and organs of generation. It has much influence over vessels within the body which contain fluids, especially the lymphatic system. The health of Aquarians is generally good, unless a strong affliction from one of the stronger planets overcomes the natural harmony of this Sign. He is disposed by temperament and disposition to lead a sensible, temperate life; seldom doing anything that will prove dangerous to his health or injurious to his bodily wellfare. Unless he is occupied in work, and work that has a purpose, this Sign is likely to develop nervous troubles which are not organic but simply the results of the confusion and sense of frustration he will feel in not using his powers and talents to good advantage. These people seem to be really ill if they are not hard at work. The very nature of their work is in itself inspiring and perhaps one of the reasons for their continued good health. They will strive to follow only that occupation or career which has a great purpose and plan within or behind it. Aquarians can never work for purely physical, material or commercial reasons. If they are obliged to do so, either because of circumstances or having as yet not found their true goal, they will decline in health as though some serious malady had afflicted them--for they live by moral and spiritual assistance, rather than physical energy.

THE Aquarian native will generally be a well-developed person in an all-round manner. He will seldom be troubled with the various weaknesses, phobias and complexes of the other Signs. His personal life will be one of moderation, temperance and tolerance in everything; and he will manifest these qualities to his fellows and family. Since he is not deeply conscious of himself as a personality, and is rarely ever held within the limits of a strong Ego-Consciousness, he does not burden himself with the many "ifs and ands" which so usually complicate the mind and activities of the average human mortal. And tending to regard all things, and people, from the view of the mountain top, rather than from immediate contact, he is not so disturbed or confused in his aims and ideas as would be the case if he attempted to personalize the world and its people.

THIS characteristic of detachment, of dispassionate observation and study, often causes others to think of Aquarius as being a Sign which has no deep emotion, no positive feelings, and very little love. The wife of Aquarius may consider her companion cold, and inclined to take too much for granted. Aquarius does take much for granted as far as other individuals are concerned. He will give them the benefit of the doubt in every case, taking for granted that they are as good as he is, as intelligent, as high-principled and as universal in their outlook. It is this last characteristic, his universality, which causes so many to misunderstand and erroneously accuse him of lack of proper feeling and respect for the individual. Since Aquarius is the Sign of the Universal Humanitarian, the Friend of Man, these Souls naturally suppose everybody to be on the same level with themselves--and they treat everybody according to the same standard. This standard will be a high one, usually too high for a Humanity which is constantly engaged in wars and conflicts of the most primitive sort. Yet Aquarius is seldom able to convince himself that such is the case; that Humanity is really not ready for the great advancements which he is eager to see brought forth and developed, for their own good and happiness.

Aquarius, very much like Libra, will blend and balance everything with everything, extreme with extreme, and seek a happy medius. He will, however, keep his observations and conclusions elevated on a highly impersonal, universal level; not recognizing classes or races or creeds as having any distinction. He sees Man as members of one great family which should be bound and blended in one supreme, classless family. Because Humanity, as a whole, has not reached this idea of universality, his plans usually seem far-fetched, visionary, and unworkable. While he may not be able to put his plans and ideas into concrete practice, he will have hosts of friends who wish him success and accomplishment in his hopes--even though they may not have much belief in the workability of his plans. They value his friendship in every way and often support him, help him to a fulfillment of a measure of his plans, even though they feel his plans are too far ahead of the age--because they love and appreciate him, personally.

AQUARIUS is ruled by the Planet Uranus, one of the most mystic and difficult to understand of all the twelve orbs. (There are actually twelve planets in our system, though only ten are used by most astrologers. The remaining two have not yet been seen or discovered by the astronomers.) Uranus seems able to operate properly only through a consciousness which is highly individualized and which has reached a broad comprehension of the universality of all life and action. Aquarius is highly individualized; but he usually does not realize it. He is so entirely individualized, so completed as a person, he is seldom in any way required to emphasize his own person, his own Self. Like the artist who has mastered the technique of his tools, he works easily and capably with them by being entirely unaware of them as so many tools. Aquarius lives and acts in the same manner. He thinks, plans, and acts almost instinctively, automatically, as an animal acts--unconscious of itself as a separate being. The Soul which has come into human life in the Sign Aquarius does so because he has reached a high point of evolution in previous lives--and has some specific mission to perform in his present identity as an Aquarian Individual. He has long ago lost all sense of separateness, or distinction, which causes most of the Race to seek ways to emphasize their individualities, their own special and particular selves. It is often said that one can not see the woods for the trees. Aquarius reverses this condition; he can seldom see the trees (the individuals) because he is too interested in the woods (the whole human race.)

IN business, Aquarians are usually far in advance of their competitors when it comes to new and novel sales ideas. Uranus, the Planet of the unusual and unexpected, seems to give its own Sign considerable more ingenuity in visualizing and conceiving novel and unprecedented plans than the other Influences of the Zodiac. It also has a good sense of beauty and harmony, being able to employ art in a concrete and practical manner, rather than in the aesthetic and spiritual sense which characterizes its related Sign of Libra. Though, again because of the unpredictable Influence of Uranus, we sometimes find Aquarian artists who prefer "Art for Art's own sake" and sacrifice splendid commercial opportunities to remain faithful to their exalted or spiritual concepts of "pure Art." But because Aquarians desire those interests and activities which are very broad and universal in their scope, taking in large groups of people, rather than the limited fields of personal careers; because of their natural internationalism, we seldom find them as store-keepers, clerks, servants and workers in the small and more or less commonplace occupations. They succeed best when in positions of trust and responsibility. As politicians, social-service workers, guardians and custodians of large properties, places and activities, they are able to express their broad and universal impulses. Theirs is a public Sign, one which automatically turns to the masses in its fulfillment of the things which seem most worthwhile and of a lasting, substantial nature. Aquarians should never limit or confine their great powers to a small, casual, temporary, path. **

THE Aquarian child is called the most interesting pupil of the Zodiac; and he will probably be more difficult to understand. Because of their unusual intelligence and understanding of Life for their tender years, it is very wise for parents and teachers to treat them as chums and companions--not as children. One should share their mature lives with these eager little Souls, for they must know the reason of everything and be able to understand it from what may seem, to parents, as too mature a view. Yet the average Aquarian child can understand much more than one would expect from such young minds. However, parents must exercise discrimination and be wise enough not to grant them too much liberty--for it can be easily turned into license by the brilliant, overconfident mind of these children. Aquarian children seldom have much in common with children of their own ages; and unless their playmates are unusually bright and intelligent, they will seek older minds for their companions. The usual toys and childish games do not appeal to Aquarian children. Games which have a distinctly educational purpose will be their choice. One need not worry about these children neglecting their studies; in fact, more attention should be given to seeing that they get plenty of physical exercise, and are not allowed to absorb themselves too much in their educational interests. Special attention should be given regarding their teeth and their tonsils, for infection is easily aggravated with this type. They are more active mentally and need to be directed to more physical activity and recreation.

IN matters of love and the affections, Aquarians will make a companionship of their marriage, rather than a highly romantic or passionate relationship. By nature, they are chaste and well in control of all their feelings. Almost never do we find abnormalities or perversions in this Sign of the Zodiac. It is so well balanced and harmonized that extremes in any personal sense are very rare with it. The Aquarian husband will want a wife who can be a pal to him in every meaning of the term. He will expect his wife to accompany him on his outings and take part much in the manner of his men friends. He is rather undemonstrable and quiet in his affections, supposing that you understand the full depth of his love--without being told of it in so many words. This may or may not please the other party; but they will seldom have to worry about any infidelity from their Aquarian wife or husband. They are never inclined to flirt or philander. Their conception of love is too high, too spiritual and too universal to ever allow them to degrade it by selfish, sensuous desires and activities. Yet it is a common complaint with most persons who are married to Aquarius that they are too broad in their interests and affections for the average marriage relation. We must understand that they can never limit or isolate their affections, even in a passionate sense, to the confines of one family. They are the loving Friend of Mankind, seeking to aid and improve the lot of all Humanity. We must expect Aquarians to be the Light-Bearers of the New Age. This is their Divine Destiny and Purpose of Life.

HARMONICS

HARMONICS IS THE MODERN APPLICATION OF THE ANCIENT WISDOM RELIGION OF ETHERIA.

The Science of HARMONICS has, as one of its major goals, an attempt to raise the whole of Reality to one Basic Formula. It seeks to include both the human and the Divine Nature within the framework of a unified mathematical system.

A study of this all-inclusive System enables us to understand what "God" is now waiting to do for us, and shows us how to co-operate with Life to achieve the ultimate goal of all human endeavors, that is: the Union of the lower nature with the Higher Self, a literal transmutation of the human into the Divine.

The word HARMONICS will henceforth serve to identify this special and specific movement of The Etheric Brothers as one of Their major channels of Instruction for the remainder of this Century of Uncertainty in our solar system.

The Philosophic System of HARMONICS shows us the proper relation of all the parts to the whole. It pinpoints our place, as future Initiates, in the entire Evolutionary Pattern and Program of the Divine-Mind-Heart-Spirit.

HARMONICS provides us, further, with a Method for Self-development that will surpass our present state of consciousness and limited human activities. At this point the scientific aspect of HARMONICS gives way to the ART of HARMONICS, as we put into practice its formulae; and become individual creators.

If the Harmonic Formula is applied the results are certain to be achieved. The time element will depend upon the intensity of the Desire and the strength of the Personal Will, in each Student of this Modern Science of Balance.

The Science and Art of HARMONICS is two-fold in its action: It seeks first to harmonize the Individuals lower nature with his Higher Self. By so doing it will eventually harmonize the affairs of communities and nations.

FIRST, each of us must harmonize and balance our own personal worlds and lives. Then, and not until then, will world balance and harmony be achieved! Your problems thus become the problems of Humanity. And, more importantly, the trials of Humanity become part of your personal responsibility and concern. HARMONICS is thus the answer to your problems. And HARMONICS is also the solution of the worlds problems--since each of us make up the complete world.

HARMONICS IS THE CHANNEL OF LIGHT FROM THE ELDER BROTHERS OF UPPER-ETHERIA (And HARMONICS is the open doorway into your own personal, eternal Freedom.)

The thirty-six Lessons in HARMONICS, together with the Brochures & Bulletins, are sufficient to establish your life and affairs on the changeless foundations of the Harmonic Law of Personal and Individual Balance. And this is Perfection.
